STUDENT	# Brian Buchalter
NANODEGREE	Front-End Web Developer
PROJECT	JavaScript Challenge

Hi Brian,

This is a great start to your JavaScript Challenge project! I have included feedback in blue on how to meet specifications. If you have any questions, please feel free to reach me at jee-coach@udacity.com.

We look forward to your resubmission!

Best,
Jee
Udacity Coach

Autograding   Does Not Meet Specifications

- One or more of the problems do not pass the autograder.
  - Required: Pagespeed Insights does not pass the autograder. Does not return the correct number.

Function Use   Exceeds Specifications

- Student creates additional functions to solve all 3 problems.

Comments   Does Not Meet Specifications

- Comments are not present in code or existing comments do not effectively explain code segments.
  - Required: Code should be commented to explain what the code is doing.

Code Quality   Does Not Meet Specifications

- Code is not formatted with consistent, logical, and easy-to-read formatting as described in the **Google JavaScript Style Guide.**
  - Required: When commenting your code, use JSDoc format to document your code.

Project Does Not Meet Specifications
